

ROFES

**Hardware and software
complex ROFES E01C**

Preclinical test of the state
of the human body

HSC ROFES E01C — this is a preclinical test that evaluates the parameters of a person's condition:

1. General state
2. Psycho-emotional state (stress level)
3. Adaptive force tension 
4. Energy resource 

General state:

Shows the adaptive capabilities of a person at the moment

- A high rating means that there are sufficient resources to adapt to changes in the environment
- A low score shows that adaptation resources are exhausted, adaptation breakdowns are possible

Psycho-emotional state:

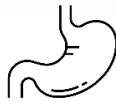

- Psycho-emotional stress level
- Signs of physical stress (physical fatigue)
- The presence of prolonged psychoemotional stress, which creates the risk of nervous disorders

HSC ROFES E01C tests 16 organs and systems in men, 17 in women

The immune system

Stomach

Pancreas

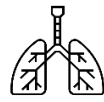

Intestines

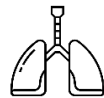

Bladder

Heart and blood vessels

Bronchi

Lungs

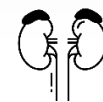

Liver

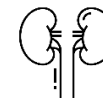

Prostate

Thyroid

Adrenal glands

Kidney

Uterus

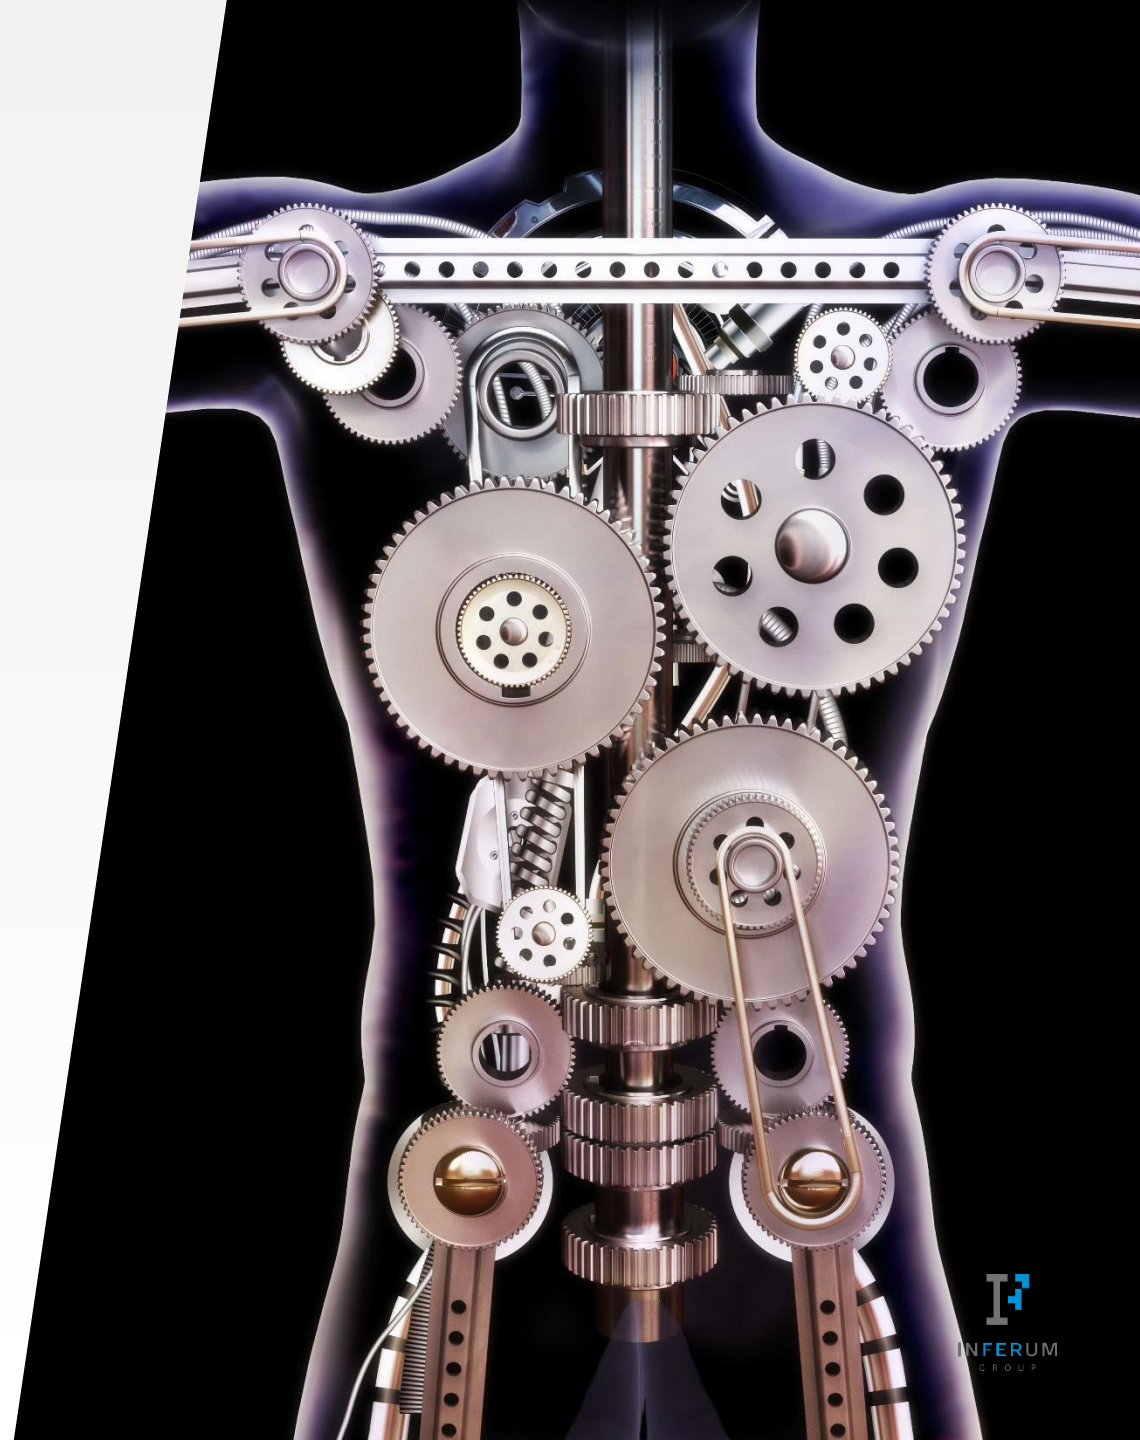

Cervical, thoracic and lumbar spine

The tension of the adaptive forces of an organ or system

Various loads (physical, nutritional, stressful and others, including diseases) activate compensatory mechanisms that allow the organ to continue functioning.

The degree of tension of these mechanisms characterizes the state of an organ or system and is assessed on a five-point scale.

Energy resource

The work of the body as a whole of individual organs and systems requires energy, which is especially actively consumed during exercise.

The energy reserve is assessed on a five-point scale.

This allows you to track the impact on him of loads and the speed of recovery during rest.

ФЕДЕРАЛЬНАЯ СЛУЖБА ПО НАДЗОРУ В СФЕРЕ ЗДРАВООХРАНЕНИЯ
(РОСЗДРАВНАДЗОР)

**РЕГИСТРАЦИОННОЕ УДОСТОВЕРЕНИЕ
НА МЕДИЦИНСКОЕ ИЗДЕЛИЕ**

от 25 февраля 2020 года № ФСР 2009/04341

На медицинское изделие

Комплекс аппаратно-программный электропунктурной диагностики функционального состояния организма "РОФЭС" (по методу Накатани) по ТУ 9442-001-39907986-97

Настоящее регистрационное удостоверение выдано

Обществу с ограниченной ответственностью Уральское научно-производственное предприятие "Альтаим" (ООО УНПП "Альтаим"), Россия, 620107, г. Екатеринбург, ул. Стрелочников, д. 33, к. 2, к. 45

Производитель

Общество с ограниченной ответственностью Уральское научно-производственное предприятие "Альтаим" (ООО УНПП "Альтаим"), Россия, 620107, г. Екатеринбург, ул. Стрелочников, д. 33, к. 2, к. 45

Место производства медицинского изделия

ООО УНПП "Альтаим", 620016, Россия, г. Екатеринбург, ул. Амундсена, д. 118-А, оф. 15

Номер регистрационного досье № РД-31343/84541 от 11.02.2020

Класс потенциального риска применения медицинского изделия 2а

Код Общероссийского классификатора продукции по видам экономической деятельности 26.60.12.129

приказом Росздравнадзора от 25 февраля 2020 года № 1375
допущено к обращению на территории Российской Федерации.

The preclinical test of the HSC ROFES E01C was created on the basis of the professional device «Complex hardware-software electro-acupuncture diagnostics of the functional state of the body» ROFES» (according to the Nakatani method), registered as a medical device in the Ministry of Health in the Russian Federation

HSC ROFES E01C
is produced according
to the patented technology,
according to the international
standard **ISO 13485: 2016**

Has all the necessary documents
and certificates

HSC ROFES E01C

easy to use:

- No special knowledge required
- Does not require medical education
- Connects to Windows PC, Android Tablets and Phones

Testing takes 3 minutes, the results do not require decoding or special knowledge

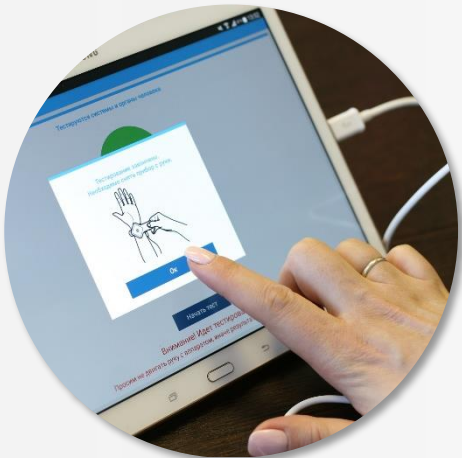

Step 1

Connect Rofes to tablet, smartphone or computer, open the program

Step 2

Place the device on your wrist

Step 3

Enter the gender and exact date of birth of the client into the new account

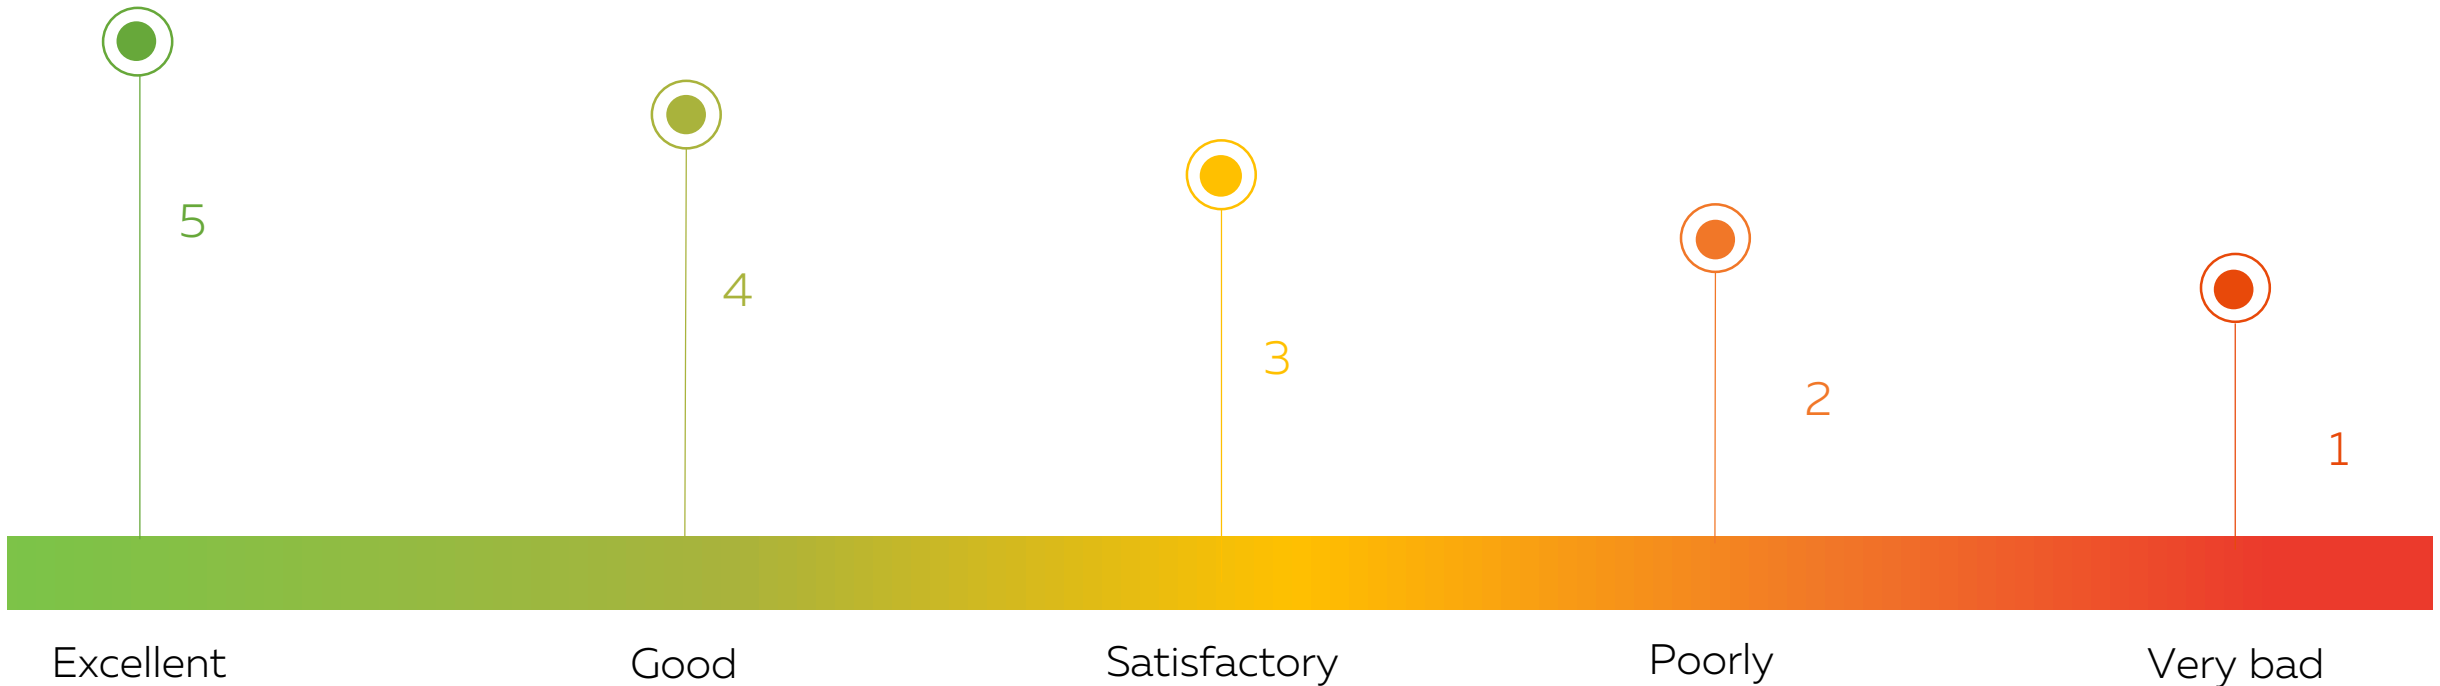

Step 4

Press the «Start» button and get the result in 3 minutes

The device evaluates deviations from age and gender norms on a five-point scale

Deviations range from 1 to 5 points:

An example of a test result – rofogram

HSC ROFES E01C allows you to create a «Pure trend» — a personal library of normal indicators

«Pure Trend» is a «library» of indicators of a person at rest, based on 5 morning rofograms taken immediately after waking up, before breakfast, taking medications and supplements, over 5 days.

With a pure trend, a person will compare measurements obtained under positive or negative effects on the human body - supplements, diet, fitness, stress, weather changes, etc.

Get the most accurate results while at rest

Morning rofogram allows you to assess the quality of the night's rest, the effectiveness of recovery after the loads of the previous day.

If it is «bad», you should deal with the quality of sleep or with the volume of previously received loads.

Regular testing of the state of the body **is a chance to prolong life**

The ROFES preclinical test detects abnormalities in the body at the initial stage in order to track the dynamics of indicators in time and take action: consult a doctor, protect yourself from a source of stress or reduce physical activity

HSC ROFES E01C — preclinical test for everyday use in every family

Become even more successful with ROFES!
